## **AMENDMENTS TO THE CLAIMS**

## 1-34. (Cancelled)

- 35. (New) A transgenic plant comprising a nucleic acid encoding a microbial β-1,4endoglucanase (EC 3.2.1.4), wherein said nucleic acid is stably integrated into a nuclear or plastid genome of the plant and is under the control of a promoter active in a plant.
- 36. (New) The transgenic plant of claim 35, wherein the promoter is a wound inducible or a chemically-inducible promoter.
- 37. (New) The transgenic plant of claim 36, wherein the chemically-inducible promoter is selected from the group consisting of a PR-1, PR-1a, PR-2, PR-3, PR-4, and PR-5 promoter.
- 12/19/06 1 38. (New) The transgenic plant of claim 35, wherein the microbial  $\beta$ -1,4-endoglucanase is from a Thermomonospora bacterium.
  - 39. (New) The transgenic plant of claim 38, wherein the microbial β-1,4-endoglucanase is thermostable.
  - 40. (New) The transgenic plant of claim 38, where in the microbial  $\beta$ -1,4endoglucanase is from T. fusca.
  - 41. (New) A transgenic seed obtained from the plant of claim 35.
  - 42. (New) A transgenic plant comprising a nucleic acid encoding a microbial  $\beta$ -1,4endoglucanase (EC 3.2.1.4) and a vacuole targeting sequence, wherein the nucleic acid is stably integrated into a nuclear or plastid genome of the plant and is under control of a promoter active in a plant.
